

## *City of Breckenridge*

# **\*\*\*NEWS RELEASE\*\*\***

**INCIDENT:**      Today at around 10:00 am the City of Breckenridge  
**9-11-15**              was made aware of a possible hazardous incident  
                         within the City Limits at Gonzales (Gonsolus) Creek  
                         regarding dead fish. The Game Warden and the  
                         Railroad Commisson have already been out and  
                         TCEQ will be out this afternoon to investigate.  
                         Further information will be provided as the  
                         investigation proceeds.

**UPDATE:**              At around 4:00 pm this afternoon we were informed  
**9-11-15**              by TCEQ that they believe it is related to Golden  
                         Algae Bloom. They have taken water samples and  
                         are waiting on test results.

**UPDATE:**              We are still waiting to hear from TCEQ on the  
**9-16-15**              water samples test results. We are hoping that we  
                         will hear by Thursday or Friday of this week. I will  
                         put out an update as soon as I hear any information.

**FINAL:**                Heard from Game Warden that the Official cause  
**10-5-15**                was due to the DO (dissolved oxygen) Level being  
                         low.
